

Colorado's new student learning skills

21st CENTURY SKILLS

Critical Thinking and Reasoning

Students use critical thinking skills to conduct research, manage projects, solve problems, and make informed decisions.

Information Literacy

Students better find, evaluate, display and use information.

Collaboration

Students work collaboratively, including at a distance, to solve problems, build solutions or produce original works.

Self-direction

Students demonstrate personal responsibility.

Invention

Students demonstrate new approaches to learning, construct knowledge, and create innovative solutions in uncertain or new problem situations.
